Subject: Microsoft Settlement

I believe it is in the best interest of America to accept the settlement and move on. The settlement despite its prejudice toward Microsoft will help our economy. I don't think the competitors have suffered from Microsoft exclusion. I think they don't have the expertise to compete. If there was a system that was as user friendly as windows it would have been just as successful. At any rate Microsoft is willing to share their technology with competitors so accept it and move forward. Sincerely Gwen Fisk Owner of Full House Exterminators
